IS WHAT YOU DO AND HOW YOU DO IT SUSTAINABLE?

Companies often focus their sustainability efforts on either their products or processes. At Close Focus, we know it takes effort to maximise the opportunity with your products and markets while increasing your resource efficiency to improve the top and bottom line of your business.

If you want to:

- Reduce your in-house costs
- Increase your Green profile
- Keep on top of your environmental compliance responsibilities

Work with Close Focus for:

- Customer Focus
- Confidential Service
- Budget Focused Approach
- Free Initial Consultation
- Technical Expertise and Reliability

STRATEGY WORKSHOPS

Sustainability needs a strategy. To get the right team working on the same page we run workshops to connect different parts of your business and align with the company sustainability vision and goals.

Close Focus Director, Frank Given, is a certified trainer and has been facilitating workshops with senior leaders, managers and shop floor staff since 2010.

CARBON FOOTPRINT ASSESSMENT AND REDUCTION

You need a starting point, a baseline to improve from, something to balance against pure financial performance. Mapping your carbon footprint gives focus to your strategy and links directly to your business cost reduction effort.

Close Focus Director, Frank Given, is a trained ISO 14001:2015 management system auditor and has worked with many certification schemes, including EMAS, ISO 14001 and Acorn (BS 8555).

BUSINESS COST REDUCTION

Efficiency savings in fuel, electricity, water and raw materials are key to reducing business overheads. By linking the technical and people skills of efficiency activities to a sustainability project will help staff see gains for the company, sustaining the savings long after the focus has moved.

COMPLIANCE MANAGEMENT – PRODUCT SAFETY

If you are making products for the European market then registration for product safety through REACH, and CLP or CE Marking will be on your radar.

Close Focus Director, Frank Given, has been providing advice and technical training on CE Marking since 2008 and integrating REACH and CLP regulations since 2013.

If you need expertise in these important product safety areas contact Close Focus and book your compliance health check.

FLEXIBLE CONSULTANCY SERVICES

We design our services to suit each client's needs, with everything we do tailor-made to ensure the best results for your business. We support your projects with professional advice on sustainability impact that is costed to ensure value for money.

Whether we're working with you to cut fuel or energy costs, maximise the use of your raw materials or keep ahead of compliance issues, we provide a targeted plan that will meet your objectives.

ABOUT US

Since 2015, Close Focus Limited has been providing end to end sustainability programs that deliver great cost savings and carbon footprint reduction through efficient resource management.

Located a short distance from Belfast City Airport and 90 minutes from Dublin, we are ideally placed to serve clients throughout the UK and Ireland.

We offer flexible terms, to serve the widest variety of business.

Our mission is to help clients:

- Gain maximum value from their physical resources
- Save money
- Reduce their carbon footprint
- Show how they are doing their bit to change the world for the better
